PROFESSIONAL SUMMARY

Systems Engineer with 15+ years owning enterprise IT infrastructure for law firms and financial services organizations, including 10+ years at a multi-site national law firm as the go-to escalation point for major issues. Expertise in Microsoft 365 hybrid, Exchange migrations (2010→2019) and Exchange Online hybrid, Entra ID / Active Directory, Azure MFA, and Conditional Access; high-availability VMware, Citrix PVS/NetScaler, HPE Nimble, Veeam, and Windows Server infrastructure; and PowerShell, Microsoft Graph, and Python automation. Pursuing AZ-104 and MS-102. Open to remote, hybrid, or on-site work; seeking Senior Systems or Infrastructure Engineer roles.

TECHNICAL SKILLS

Microsoft 365: M365 Tenant Admin & Hybrid Coexistence | Exchange 2010–2019 | Exchange Online Hybrid | Public Folders
Identity & Access: Entra ID Hybrid Sync | Active Directory | Azure MFA | Conditional Access | Group Policy | User Provisioning
Security & Compliance: Proofpoint | EWS Threat Blocking | eDiscovery | Retention | DLP Support | Teams/SharePoint Permissions
Infrastructure: VMware vCenter/ESXi | Citrix PVS & NetScaler | HPE Nimble | Veeam | Windows Server | File Server & DFSR
Network, Endpoint & Apps: DNS/DHCP | VPN | Networking | Intune | BlackBerry | Citrix XenMobile (MDM) | iManage Cloud (DMS)
Automation & AIOps: PowerShell | Microsoft Graph | Python | Ollama LLM | CrewAI | AIOps & MLOps | Monitoring & Self-Healing

PROFESSIONAL EXPERIENCE

Systems Engineer

McGlinchey Stafford PLLC, Baton Rouge, LA | October 2015 – January 2026

- Go-to escalation engineer for major issues at a multi-site national law firm; trusted by peer engineers for judgment. Mentored junior admins and helped them troubleshoot.
- Owned hybrid identity and access management: full-lifecycle AD, Entra ID hybrid sync, Azure MFA, and Conditional Access.
- Managed high-availability infrastructure with 24x7 on-call: Citrix XenApp/XenDesktop on PVS (~16 XenApp servers, all golden images, StoreFront/NetScaler, DR environment), VMware, HPE Nimble, and Veeam.
- Designed automated user provisioning/de-provisioning across AD, M365, and HR systems.
- Managed Windows file server storage and DFS Replication (DFSR); supported iManage Cloud (document management), helping resolve iManage cloud agent issues when needed.
- Led Exchange migrations (2010→2016→2019), including public folders, and enabled Exchange hybrid with Microsoft 365 (Exchange Online) with very little downtime; architected M365 hybrid coexistence with secure identity lifecycle workflows.
- Managed ~500–600 active mailboxes (~2,000 total, including inactive mailboxes retained for legal and policy reasons).
- Performed extensive eDiscovery and retention work for legal and policy needs; assisted the security team with DLP issues.
- Built and managed Proofpoint email security; helped implement security rules blocking external EWS threats.
- Supported Microsoft Teams and SharePoint Online access and permissions administration.
- Helped the desktop team resolve escalated MDM issues across BlackBerry, Intune, and Citrix XenMobile.

Systems Engineer II / Systems Engineer I

CRIF Lending Solutions, Baton Rouge, LA | April 2011 – October 2015

- Advanced from SE I to II managing Exchange 2010, Windows Server infrastructure, monitoring, patching, and early hybrid cloud initiatives in financial services, in an environment of ~1,000 servers (including ~30 Citrix servers).

Systems Administrator

Jefferson Financial Credit Union, Baton Rouge, LA | January 2009 – March 2011

- Managed daily Windows Server operations, backups, networking, and security across multiple branch locations.

CAREER TRANSITION & PROFESSIONAL DEVELOPMENT

January 2026 – Present | Baton Rouge, LA area

Maintained senior-level expertise through structured independent projects focused on automation, observability, AIOps, and hybrid cloud modernization.

- Built production-grade hybrid M365/Exchange lab on Proxmox replicating enterprise coexistence, migrations, HA configs, and secure identity management.
- Developed automation & monitoring using PowerShell, Microsoft Graph, and local LLM agents (Ollama + CrewAI) for AIOps pipelines, anomaly detection, and self-healing scenarios.
- Pursued AZ-104 (Azure Administrator) and MS-102 (M365 Enterprise Administrator) certifications while creating documented, enterprise-ready infrastructure artifacts and scripts.

EDUCATION & CERTIFICATIONS

Associate of Applied Science, Information Systems — Baton Rouge School of Computers, 2006–2009
Certifications: MCSA, MCP **In Progress:** AZ-104 Azure Administrator | MS-102 M365 Enterprise Administrator
